Self Introduction

My name is An-Chi Tsao, I come from Taiwan, and graduated from National Formosa University with a Bachelor's degree in electronic engineering, and graduated from National Kaohsiung University of Science and Technology with a Master's degree in chemical and material engineering in one year.

I'm working in ASE semiconductor, work as an R&D engineer of the photolithography process and product engineer of the SiP module.

In the field of the photolithography process, responsible for new process developers, new material evaluation, issue, and yield improvement.

In the field of a product engineer, responsible for process integration, new process developer, customer contact, issue handle, currently, Japanese customers are mainly responsible for projects.

I think that teamwork has always been a crucial factor in success for any organization. Frequent discussion can help boost group thinking and thus make it easier to fulfill the task. I believe there are various ways to resolve problems. I drive myself to be open-minded when making decisions because I think to own a positive attitude and always look a bright side is very important to me.

In the future, I will endeavor not only in the field of my profession but also the enhancement of my language ability like English and Japanese and so on. Life is short, time becomes relatively important, I will try as hard as possible to fulfill myself.

I'm determined and committed person, and due to my background, I have professional training and a good attitude, I will contribute what I've learned and act as an active team player to make the whole team reach a better level.
